

OVERVIEW OF ALTERNATIVE PRODUCTS FROM BEHR HELLA SERVICE

- Alternative products to the corresponding Behr Hella Service original parts
- Alternative for repairs in relation to the current value of the car
- Ideally suited to older vehicles
- Radiators, a/c compressors, and a/c condensers for selected vehicles
- Product range now includes around 250 alternative products

Behr Hella Service provides a good alternative.

It makes perfect economic sense that parts from a lower price segment can also be used when repairing older vehicles in line with their current value.

As there is a demand here with regard to coolant radiators, a/c compressors, and a/c condensers, Behr Hella Service has developed an additional range of parts aimed at specific vehicles – as an alternative to the original parts that are being offered simultaneously.

Alternative products are labeled with "Alternative".

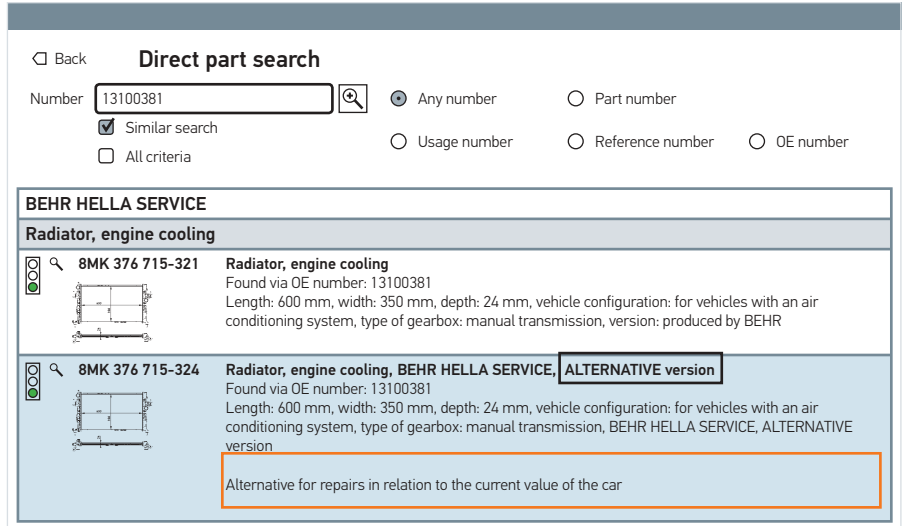

The alternative items which are being offered parallel to the corresponding original parts are provided with a separate part number and are labeled "Alternative". The labels for the alternative products are specified in catalogs, TecDoc, and on the packaging label.

With **radiators, a/c condensers, and a/c compressors**, the thermal management experts, Behr Hella Service, are giving garages the opportunity to bring their quality awareness in line with the requirements of the market.

METHODS OF LABELING ALTERNATIVE PRODUCTS

Labeling in the electronic TecDoc catalog

Labeling using the example of coolant radiators and a search via OE number: The alternative part for repairs which correspond to the current value of the car is shown directly below the Behr Hella Service original part.

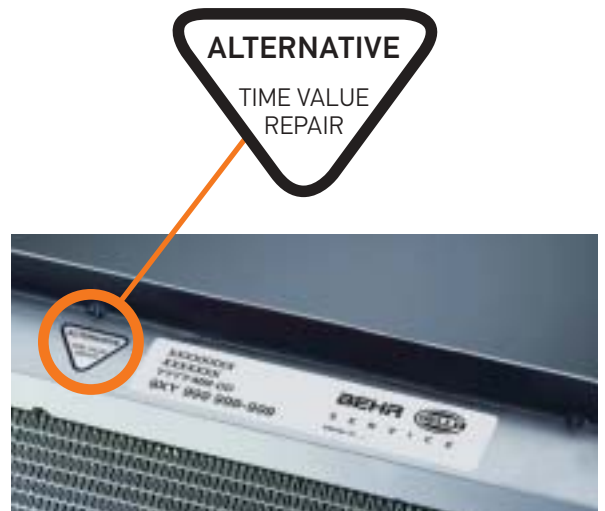

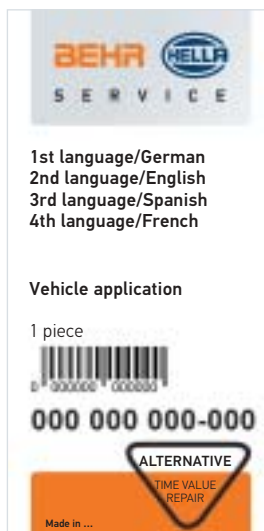

Labeling in printed Behr Hella Service catalogs

Labeling using the example of radiators and a search via vehicle: The alternative part for repairs which correspond to the current value of the car is shown directly below the Behr Hella Service original part. The alternative part is indicated with a dot under the "Alternative" icon.

Labeling on the packaging label and on the product itself

Since Spring 2013, an "ALTERNATIVE TIME VALUE REPAIR" label has been displayed prominently on the packaging label and on the product itself.
